

## **Douglas J. Canning**

Douglas Canning is a senior planner and environmental scientist with the Shore-lands Program, Washington Department of Ecology. He works principally in the areas of coastal zone management, environmental analysis, and information transfer. In recent years he has worked with the Aquatic Habitat Guidelines Program, a state interagency habitat management guidelines workgroup; cooperatively with Washington Sea Grant, he has delivered a quarterly professional development seminar series for local government shoreline and coastal planners for over ten years; and has provided internal consulting services in environmental analysis and resource management within the Department of Ecology. Doug has been an Affiliate Associate Professor at the School of Marine Affairs, University of Washington since 1997. He was also affiliated with the Climate Impacts Group (CIG) at the University where he worked on coastal climate impacts and responses to sea level rise, and from 1999 to 2002 was principal of the CIG's Coastal Sector. Doug holds MS and BA degrees in Environmental Science from The Evergreen State College, Olympia, Washington. He is President of the Nisqually Reach Nature Center, a private, nonprofit, estuarine environmental education organization. In the past he has served on the Advisory Board of Greenhouse Action of Seattle (1990-92); as co-chair of the North Thurston County Groundwater Management Advisory Committee (1988-92); and on the Board of Directors of the Washington Environmental Council (1987-89).
